

Dando Terrier

Track Mounted Dynamic Sampling Rig

DIMENSIONS

| | Travelling | Working |
|---------|------------|---------|
| Length: | 2700mm | 2800mm |
| Width: | 800mm | 1000mm |
| Height: | 1500mm | 2850mm |
| Weight: | 1300kg | |

CAPABILITY

- Dynamic Sampling to 15m
 - "Windowless" liner samples
 - UT100/U100
 - U38
- SPT
- Dynamic Probing to 30m

Built-in workpiece clamp and rod racking.

COMPANY HOLDING

2No.

The Dando Terrier is a tried and tested model, at home inside domestic properties and industrial premises as it is on remote hillsides and highway sites. Transportable by van or trailer (allowing rapid deployment and self-contained mobilisation) the Terrier provides soft-ground sampling capability in a wide range of settings.

Terrier can deploy insitu testing (SPT and Dynamic probe) backed up by sampling (U100, UT100 and Liner) in virtually any environment. With a travelling width of just 800mm, it can fit through domestic doorways, and weighing just 1.3t, can be deployed with a variety of low-impact temporary works solutions to access challenging locations.
